ABOUT ME

Hi there! I'm Kaj, a developer and software engineer based in Antwerp, Belgium.

My journey in programming started **eight years ago**, and it has evolved into a deep interest for building things that live on the internet.

I enjoy the **entire process** of development, from designing and building **intuitive user interfaces** for websites and apps to designing and implementing the **robust backend services** that make them work.

EDUCATION & INTERNSHIPS

KTA DaVinci

Sep 2021 - Jun 2023

Applied Computer Science

Graduated

KdG University

Sep 2023 - Present

Applied Computer Science

Currently in my third year
